

## SCHOOL DISTRICT OF LADYSMITH PROJECT PROGRESS REPORT

October 2022 Update

BRAY'S DESIGN PRESENTATION TO THE DISTRICT

## UPDATES & INFORMATION

### WHAT'S NEW?

At the High School / Middle School project, conversations continue to focus on the importance of sustainability and the impact this will have on the energy efficiency of the new HVAC equipment, insulation requirements of the building additions, and the types of products specified. The quality of the indoor environment will be improved and will have a positive effect on the student and faculty.

### PLANNING & DESIGN UPDATE

The design of the new Media Center has been finalized, along with all the interior finishes.

The overall design concept derives from Ladysmith's northern Wisconsin location inspired by the wood, rock, water, and lakeside sunrises. The palette acts as a foundation, providing all spaces, athletics, auditorium, classrooms, and media center with a rich and timeless neutral base while infusing school spirit.
